PDF: 
Legitimacy: High Confidence
Verification: confirmed (WebFetch)
Date: 2026-05-21

A) ROLE SUMMARY

Dimension	Detail
Archetype	AI Forward Deployed (primary) + AI Transformation Lead (secondary)
Domain	Process Intelligence / Process Mining - enterprise SaaS
Function	Consult / lead / strategic account ownership
Seniority	Senior director / VP equivalent - 15+ years required
Remote	Hybrid - Zurich, Switzerland (explicit residency requirement)
Team size	Cross-functional Celonis teams (internal orchestration)
TL;DR	Senior strategic lead who owns the complete customer value journey for Celonis's strategic Swiss accounts - C-suite engagement, transformation programme delivery, adoption metrics, and advisory board operations.

A) NOTE ON 014 VS 015

Reports 014 (Client Engagement Partner) and 015 (Client Value Partner) are substantively the same role posted under two different titles, same location (Zurich), same requirement profile (15+ years), same recruiter (Daniel Toth), same job board. The only difference observed is the title. Both are disqualified by the same hard blockers.

This report provides a full evaluation for completeness. Where the analysis is identical to 014, that is noted.

B) MATCH WITH CV

Requirement Mapping

JD Requirement	CV Match	Strength
15+ years customer success, strategy consulting, or related	20+ career years but in education, lab-building, project management, startups - not enterprise customer success	Weak (years yes, context no)
Large-scale transformation programmes	Aeres 8-course merge; Windesheim Spark! Lab; SafeScrum school-wide rollout	Strong analogy - institutional not enterprise
Change management expertise	"Organizational Change & Implementation (Expert)"; Scrum implementation	Strong methodology
Executive C-suite engagement	KONGSBERG CEO escalation (single-incident proof); no sustained C-suite account management	Weak
AI-driven transformation	AI lab at Windesheim; VCH tooling; self-hosted AI stack deployment	Moderate - lab context
Process mining / Celonis platform	No evidence	None

Adoption metrics / value realization targets	No quota-carrying history; Tonomy Foundation flagged as risk context	Concerning
Project management across multiple workstreams	"Project & Program Management (Expert)"; COVID-19 Mega Project; VCH + Spark! simultaneously	Strong
Switzerland residency + work authorization	Baarn, Netherlands - does not qualify	Hard blocker

Gaps

Gap	Blocker?	Mitigation
Switzerland residency	Hard blocker - explicitly stated	None
Enterprise CS / consulting 15yr track record	Hard blocker	Cannot bridge at application stage
C-suite account management sustained history	Hard blocker	None
Adoption quota / revenue accountability	Flagged risk per _profile.md	None
Celonis platform knowledge	Moderate	Self-study via Celonis Academy - moot given other blockers

C) LEVEL AND STRATEGY

Not applicable. Same analysis as 014. Two hard blockers (location + experience archetype) terminate analysis. The role is at Director/VP level in enterprise SaaS strategic accounts - a distinct career track from Christiaan's lab-builder/educator profile.

D) COMP AND DEMAND

Item	Data	Source
Client Value Partner (Celonis, Zurich)	\$180,000-\$280,000+ USD base + bonus + RSUs - Zurich is a premium market	Levels.fyi; Glassdoor; Switzerland salary benchmarks
Benefits	24 weeks paid parental leave, unlimited PTO, equity, wellness - competitive by any market	JD confirmed
Christiaan's target	€65,000-€90,000	_profile.md
Fit	Compensation would significantly exceed target - irrelevant given blockers	N/A

E) CUSTOMIZATION PLAN

Not applicable.

F) INTERVIEW PLAN

Not applicable.

G) POSTING LEGITIMACY

Assessment: High Confidence

Signal	Finding	Weight
Posting freshness	API returned full content; active in Greenhouse	Positive

Apply button	Active	Positive
JD specificity	Named role (CVP), Value Engineering department, Switzerland-explicit, same recruiter (Daniel Toth) as 014	Positive
Requirements realism	15 years for a senior strategic account role is standard at this seniority level	Positive
Company signals	Celonis is a leading funded SaaS company; no hiring freeze signals in strategic accounts	Positive
Relationship to 014	014 and 015 are near-identical roles under different titles from same recruiter - may be two positions, or may be the same posting with a title change. Either way both are active.	Neutral
Reposting pattern	No prior appearance in scan history	Positive

Context Notes: The presence of 014 and 015 as near-duplicate postings is worth noting but not alarming - Celonis may be hiring 2 CVPs, or may have revised the title during the posting lifecycle. Both appear to be genuine openings.

RECOMMENDATION

Score: **2.1/5** - Identical conclusion to 014. Two independent hard blockers:

1. **Switzerland residency required** - Christiaan does not qualify. This is a stated, non-negotiable restriction.
2. **Experience archetype mismatch** - The role requires 15+ years of enterprise-scale strategic customer success or strategy consulting. Christiaan's transformation and change management expertise is genuine, but the client-facing enterprise consulting context is absent. Additionally, the adoption-target accountability triggers the Tonomy Foundation risk flag from _profile.md.

Do not apply.

Note for future reference: Celonis does operate in the Netherlands and DACH. If Celonis posts roles in Amsterdam or remote-EU that focus on process mining enablement, learning, or internal transformation - those would be worth evaluating. The company's focus on AI-driven process intelligence aligns well with VCH and supply chain compliance work. Wrong role, right company to watch.

KEYWORDS EXTRACTED

Client Value Partner, CVP, process intelligence, process mining, AI transformation, change management, C-suite relationships, enterprise SaaS, value engineering, adoption metrics, strategic accounts, transformation programme, customer advisory board, executive engagement, Celonis, Zurich, Switzerland, value realization, cross-functional orchestration, account ownership

JOB DESCRIPTION (ARCHIVED)

Archived 2026-05-21 - original posting may be removed after offer closes

Title: Client Value Partner (CVP) - AI-Driven Transformation & Process Intelligence

Location: Zurich, Switzerland

Department: Value Engineering

Company: Celonis

Job ID: 7669258003

Requisition ID: 614x

Recruiter: Daniel Toth (d.toth@celonis.de)

Celonis, the global leader in Process Intelligence, seeks an experienced Client Value Partner to drive transformation with strategic customers. This role serves as the accountable lead for customer success, engaging C-level executives to define long-term vision for Celonis adoption.

Key Responsibilities

The position requires leading cross-functional teams and managing executive relationships. You'll develop and maintain strong relationships with key stakeholders, including C-level internal/external executives while ensuring proper resource allocation across Celonis departments.

Value delivery involves owning the end-to-end customer value journey and driving adoption metrics. You'll resolve escalations and align Celonis initiatives with customer strategic objectives, establishing programme roadmaps and value plans collaboratively.

Community building includes organising customer advisory boards and acting as the voice of the customer internally, fostering innovation and thought leadership opportunities.

Required Qualifications

Minimum 15 years in customer success, strategy consulting, or related transformation experience. Candidates need demonstrated expertise in large-scale transformation programs, change management, and executive engagement. Experience with AI-based transformation is valued.

Essential skills include project management across multiple streams, ability to translate use cases for business impact, and comfort operating within ambiguous, fast-paced environments.

Important Restriction: "We are currently only considering candidates who are already based in Switzerland and have the legal right to work in Switzerland. We are not able to offer relocation or visa sponsorship for this role."

Compensation: Base salary plus bonus/commission, equity, and comprehensive benefits including 24 weeks paid parental leave and unlimited PTO.
