Baarn, Netherlands

PROFESSIONAL SUMMARY

Designed and delivered simulation-based and game-based learning experiences across university, fintech training, and supply chain contexts. Bachelor thesis (grade 8.7) on simulation-based training methodology. ADDIE-adjacent practitioner: needs assessment, design, build, delivery, and iteration. 10+ courses still in active independent use. Articulate 360 named as gap; fast learner with existing authoring tool experience.

CORE COMPETENCIES

Learning Experience Design

ADDIE Methodology

Simulation-based Learning

Game-based Education

LMS / LXP Management

Content Development

Adult Learning Theory

AI-driven Content

Authoring Tools

L&D Program Management

WORK EXPERIENCE

Viridis Green-Tech AG2024 - Present

Innovation Architect Munich, Germany (Remote)

- Blockchain Ecosystem Architecture** -- Defined and prototyped structure for blockchain-powered supply chain traceability and verifiability system in DACH market
- Business Alignment** -- Aligned lab projects with commercial development and sustainability goals; co-authored early-stage grant proposals for open infrastructure and compliance tooling

Windesheim University of Applied SciencesJan 2020 - Present

Project Manager -- Supply Chain Finance Lectoraat Zwolle, Netherlands

- Value Chain Hackers** -- Created AI-driven innovation lab for supply chain traceability, sustainability, and CSRD/EUDR compliance; deployed full AI stack (Flowise, OpenWebUI, n8n, Supabase) on self-managed Linux/Docker infrastructure
- COVID-19 Mega Project** -- Merged 8 interdisciplinary university courses into single simulation-based program in under 2 months; mapped dependencies, ran cross-lead reviews, rebuilt assessment model mid-flight
- Spark! Living Lab** -- Founded and ran blockchain-based simulation and agile supply chain education lab; delivered the BlockBeer game; cross-European programs running 5 years on
- DevOps** -- Full lifecycle (provisioning, containerization, CI/CD, monitoring, incident response) across all lab environments since 2020; 10+ years DevOps practice

Tonomy Foundation2021 - Present

Co-Founder & Board Member Amsterdam & Remote

- Pangea Vault** -- Co-designed first version of Tonomy's MICA-compliant digital identity vault; W3C-recognized open-source ecosystem
- Led strategy, technical positioning, partner development, and community operations on 2-week agile sprint cycles; transitioned to board oversight

COTITJan 2024 - Jul 2024

Business Innovator Almere, Netherlands

- Defined functional SaaS sales cycle, restructured internal roles and workflows using agile methods, provided financial organization guidance for early scale-up phase

Open Food Chain	2022 - 2024
Community Manager Amsterdam / Remote	
Built and moderated technical and stakeholder community (Discord); ran agile sprints for software development; wrote smart contracts; supported investor outreach that led to new investment	
Aeres Hogeschool Dronten	2021 - 2022
Lab Manager Dronten, Netherlands	
Agile Course Integration -- Implemented agile learning model merging 8 separate courses into one sprint cycle using SafeScrum in under 2 months Veles Farming -- Recognized potential in student project, seed-invested, supported launch; now operating agri-tech startup in Slovakia (EUR 2M funding)	
Social Chicken	2016 - 2022
Freelance Senior Project Manager & Educator Amsterdam, Netherlands	
- Delivered private cloud setups, database migrations, and BI dashboards for SMEs; full DevOps stack including Linux, Nagios monitoring, CI/CD pipelines Interactive -- Technical due diligence of pre-seed startup codebase; positive investment recommendation; 4x exit achieved	
Hogeschool InHolland	2021 - 2022
Guest Lecturer & Course Designer Netherlands	
Designed and delivered Blockchain Minor ("Build Your Own Crypto") and Dashboarding & Analysis courses; both still in active independent use; identified and sponsored Magic Frames and Veles Farming student ventures	
The Fork (now Open Food Chain)	2018 - 2020
Head Trainer & Innovator Amsterdam, Netherlands	
Led professional training in digital food technology; hired and mentored students to co-develop production software; managed DevOps infrastructure; designed physical blockchain training object making abstract concepts tangible	
ROC Midden Nederland	2018 - 2020
Freelance Educator -- Agile Learning & Digital Projects Utrecht, Netherlands	
Designed agile classroom format mimicking startup environments; gamified role-play modules where students practiced presentation, negotiation, and digital strategy	
KONGSBERG	2012 - 2013
Field Service Engineer / Data Quality Consultant Kristiansand, Norway	
BP Jordan & Oman -- End-to-end BI implementation: hardware installation, server/MOXa configuration, software rollout, data configuration, dashboard creation, on-site staff training and sign-off Statoil -- Production analytics deployment, user training, and documentation BP Azerbaijan -- Data-transfer integrity oversight between partner systems; defined standards, monitored compliance, trained client staff	
Meerschap B.V.	2010 - 2011
System Manager & Researcher Amsterdam, Netherlands	
Implemented and customized Nagios monitoring for hospitals, pharmacies, and mortgage firms; hardware installation, system maintenance, and workflow automation	
WDS Global	2008 - 2010
Technical Support Engineer (3rd Line) & Trainer Poole, England	
Cleared 10,000+ email backlog in Dutch support department by redesigning templates and workflows; designed HTC tutorial video series later adopted globally; trained Tesco Scotland retail staff on smartphone sales	

SELECTED PROJECTS

2bSMART 2020 - 2022

Delivered blockchain technology training using interactive logistics simulations for supply chain professionals across Benelux. Collaborated on design of Smartys simulation platform. Cross-European consortium project.

2bsmart.cz

The Beergame (Redesign) 2020

Rebuilt the classic logistics bullwhip-effect simulation with a modern teaching format and interface; blockchain vs. non-blockchain comparison version for supply chain education across Benelux institutions.

demonstrator.valuechainhackers.xyz

Magic Frames 2022 - 2025

Guided student startup from early concept to independent launch; evolved from fashion-tech to platform for music artists blending storytelling, event culture, and lenticular photography. Directly sponsored and mentored to launch.

mgframes.nl

Value Chain Hackers 2024 - Present

Cross-European initiative building AI-powered supply chain traceability and compliance tools for CSRD, CSDDD, and EUDR. Principal investigator for Windesheim Supply Chain Finance lectorate innovation agenda. Deployed full AI stack on self-managed infrastructure.

valuechainhackers.xyz

EDUCATION

Bachelor of Business Administration, Business IT & Management	2010 - 2014
Hogeschool van Amsterdam -- Grade 8.7. Thesis: simulation-based learning and training methodology at Kongsberg.	
Technical Informatics	2006 - 2007
Hogeschool van Amsterdam	
Senior General Secondary Education (HAVO), Theoretical & Mathematical Physics	2002 - 2006
Hermann Wesselink College	

CERTIFICATIONS

Scrum Master	Scrum.org	2018
Professional Scrum Product Owner I (PSPO I)	Scrum.org	2019
PRINCE2	Axelos	2019
ITIL Foundation	Axelos	2019
Train the Trainer (Blockchain)	Blockchain Workspace	2021
ESG & Sustainable Supply Chains	Online	2023
Data Analysis & Visualization (R, Python)	Online	2020
Oracle 11g Essentials & SOA Concepts	Oracle	2012
Offshore Survival Training / HUET	Falck	2012

SKILLS

Program Management: Prince2, ITIL, sprint planning, budget management, grant writing (EUR 2M secured), stakeholder reporting

Agile & Facilitation: Scrum Master (15+ yr), Kanban, SafeScrum, PSPO I, workshop design, simulation-based learning, retrospectives

DevOps & Infrastructure: Docker, Kubernetes, GitHub CI/CD, Jenkins, Linux (Ubuntu/CentOS/Debian), Nagios, Grafana, PostgreSQL, MySQL, Oracle SOA

AI Stack: Flowise, OpenWebUI, n8n, Supabase, LLM deployment, self-hosted AI infrastructure, prompt engineering

Blockchain & Identity: SSI, MICA compliance, Ethereum, smart contracts, HyperLedger, EOSIO, supply chain traceability

Business: business development, process design, stakeholder alignment, partner ecosystems, startup incubation (10 ventures advised or co-founded)

Languages: Dutch (native), English (near-native), German (conversational)
