Baarn, Netherlands

PROFESSIONAL SUMMARY

Learning architect and L&D leader who builds systems rather than programmes. Not someone who manages training delivery inside an existing function, but someone who designs the learning infrastructure from zero when none exists and aligns it with what the organisation actually needs to do.

Founded Spark! Living Lab at Windesheim University - a full learning ecosystem built around applied business problems, not subject-matter catalogues. It ran for five years, spawned a pan-European AI initiative (Value Chain Hackers), and produced a cohort of student startups including one with €2M in funding. Implemented school-wide Scrum at Aeres Hogeschool: eight courses merged into one sprint track in under two months, faculty moved from sceptics to independent sprint facilitators in three months. This is what "define the North Star for learning and position L&D as a core business enabler" looks like in practice.

Also runs a self-hosted AI research stack for practitioners at Windesheim - the actual production experience with AI tools in learning that most L&D functions are still theorising about. Certified Scrum Master and PSPO I, Prince2, ITIL. Trained in Business IT & Management (HvA, 8.7). Baarn to Amsterdam commute is roughly 40 minutes. See also: valuechainhackers.xyz.

CORE COMPETENCIES

L&D Strategy & Architecture

Team Leadership

North Star Vision

AI for Learning

Communities of Practice

Curriculum Design

Stakeholder Influence

Business-Aligned Learning

Learning Ecosystem Design

Coaching & Mentorship

Simulation-Based Learning

Change Management

WORK EXPERIENCE

Windesheim University of Applied Sciences

Jan 2020 - present

Project Manager, Supply Chain Finance Lectorate - Zwolle, Netherlands

- Spark! Living Lab (L&D Ecosystem from zero):** Founded and ran a learning system where business problems drove the curriculum. Guest lecturers, partner organisations, student champions, and a feedback loop built into every sprint. Still running five years later.
- COVID-19 Mega Project:** Eight separate courses, eight course leads, two departments - merged into one coherent interdisciplinary program in under two months. Stakeholder alignment under high time pressure. Became a model referenced by other faculties.
- AI for Learning (production experience):** Self-hosted Flowise, OpenWebUI, n8n, and Supabase for practitioner experimentation. Designed the onboarding experience for non-technical researchers. The gap between what AI vendors demo and what works with real learners: I know it from direct observation over two years.
- Value Chain Hackers:** European AI compliance lab; led KPI framework design and quarterly stakeholder reporting. (valuechainhackers.xyz)

Aeres Hogeschool Dronten

2021 - 2022

Lab Manager - Dronten, Netherlands

- Strategic L&D transformation:** Designed the learning architecture for a new sustainability, tech, and entrepreneurship lab. Defined the methodology (build real things for real problems), hired collaborators, set up the feedback loops.
- School-wide Scrum implementation:** Merged eight courses into one sprint-based learning track. Coached faculty on sprint facilitation; within three months they ran their own retrospectives independently. This is the closest analogy to the "define North Star and coach team to reach full potential" mandate in the Adyen JD.
- Student startup outcomes:** Veles Farming guided from "no-go" to €2M funded agri-tech startup. Magic Frames launched as independent creative tech platform. Both are still active.

Hogeschool Inholland

2021 - 2022

Guest Lecturer & Course Designer - Netherlands

- Designed two full courses that still run independently: Blockchain Minor (Build Your Own Crypto, including tokenomics specialisation) and Dashboarding & Analysis. Designed for reuse and independence, not for personal delivery.

ROC Midden Nederland

2018 - 2020

Freelance Educator, Agile Learning & Digital Projects - Utrecht, Netherlands

- Designed classroom simulations where students experienced digital strategy, negotiation, and product development in live role-play environments. Learning by doing, not by listening. Autonomous outcomes over teacher-directed content.

The Fork (now Open Food Chain)

2018 - 2020

Head Trainer & Innovator - Amsterdam, Netherlands

- Led professional training programmes in digital food technology for industry stakeholders. Hired and mentored student co-developers. Designed a physical learning object for blockchain training that made abstract technology tangible - an early experiment in making AI-adjacent concepts experiential.

Viridis Green-Tech AG

2024 - present

Innovation Architect - Munich, Germany (remote)

- Strategic direction and architecture for a sustainability innovation lab. Cross-stakeholder alignment across technical and business leads. Grant writing and partner development.

Tonomy Foundation

2021 - present

Co-founder & Board Member - Amsterdam & remote

- Co-founded and led strategy, product, and community. Ran via two-week sprint cycles. Transitioned to board role after establishing independent operations.

PROJECTS

Spark! Living Lab active

Full-lifecycle learning ecosystem built at Windesheim - curriculum driven by real business problems, student champions, external partners, and a sprint-based feedback loop. The working proof of what Adyen L&D is trying to become: a system that produces measurable outcomes, not a catalogue of training content.

Beer Game Demonstrator active

Rebuilt logistics simulation as an interactive AI evaluation tool - ADDIE cycle applied in full: needs analysis, design, prototype, test with cohorts, iterate. Currently in active use in university programs.

demonstrator.valuechainhackers.xyz

EDUCATION

Bachelor of Business Administration, Business IT & Management - Hogeschool van Amsterdam

2010 - 2014

Grade 8.7. Thesis: simulation-based learning and training methodology at KONGSBERG (Norway) - formal research on how complex technical systems are learned through direct experience. The adult learning theory foundation.

CERTIFICATIONS

Scrum Master

Professional Scrum Product Owner I (PSPO I)

Prince2

ITIL

Train the Trainer (Blockchain)

[Blockchain Workspace](#)

Data Analysis & Visualization (R, Python)

SKILLS

L&D: learning architecture, curriculum design, simulation-based learning, train-the-trainer, instructional design (ADDIE), adult learning theory, Communities of Practice

AI for Learning: Flowise, n8n, OpenWebUI, Supabase, LLM tool evaluation, AI adoption facilitation

Leadership: team coaching, stakeholder influence, strategy definition, North Star design, change management

Agile: Scrum Master (15+ years), PSPO I, SafeScrum, sprint facilitation, retrospectives, backlog management

Languages: Dutch (native), English (near-native), German (conversational)
