## PROFESSIONAL SUMMARY

Open-source ecosystem builder and software alliance practitioner who has spent 15+ years building the partner networks, enablement content, and adoption communities that make technology stick inside organisations. Not a traditional alliance manager - someone who has built ecosystems from zero, in production, without external help.

At Tonomy Foundation (co-founded): built the open-source digital identity ecosystem from scratch, engaged the W3C DID working group, authored the whitepaper that anchored the GTM narrative, and mapped and onboarded the partner network. At Open Food Chain: built and moderated a technical and stakeholder community of 200+ members, simplified investor documentation, and helped attract new investment through community credibility. At WDS Global: designed a tutorial video series for HTC that was adopted globally as standard customer education. The content outlasted my time there by years.

10+ years running Ubuntu-based infrastructure in production. I understand the Canonical platform from the operator side - what ISVs actually need from Ubuntu, what breaks, and where the documentation gap is. All key projects use open-source stacks. The open-source ethos is not a selling point for me; it is how I build. Fully remote since 2020. Comfortable with 25% travel. See also: [valuechainhackers.xyz](https://valuechainhackers.xyz).

## CORE COMPETENCIES

Software Ecosystem Development

Alliance Management

Partner Enablement

Open Source GTM

Technical Content Creation

Community Activation

W3C / Standards Engagement

Ubuntu / Linux (10+ years)

Cross-cultural Partner Communication

Stakeholder Alignment

Whitepaper & GTM Narrative

Business-IT Translation

## WORK EXPERIENCE

Tonomy Foundation2021 - present

Co-founder & Board Member - Amsterdam & remote

- Software Ecosystem from zero:** Co-founded an open-source, MICA-compliant digital identity protocol. Mapped the full ecosystem - partner categories, gaps, onboarding path. Engaged the W3C DID working group as the credibility anchor for the software community.
- Whitepaper as GTM asset:** Co-authored the whitepaper that defined the protocol's positioning, stakeholder narrative, and ecosystem entry points. Used as the primary enablement document for partner and investor conversations.
- Alliance partner onboarding:** Structured and ran the process for bringing on ecosystem partners - translated technical architecture into partnership value propositions, managed sprint-based delivery cycles.

Open Food Chain2022 - 2024

Community Manager - Amsterdam / remote

- Community of 200+ members built from zero:** Discord-based technical and stakeholder community. Recruited early adopters, designed engagement rituals, created a moderation team. Community credibility directly supported new investor onboarding.
- Investor enablement documentation:** Simplified complex technical documentation into accessible partner-facing materials. Translated blockchain architecture into language that non-technical investors could act on.
- Wrote smart contract templates, facilitated blockchain literacy workshops, ran agile sprints for software development.

## Windesheim University of Applied Sciences

Jan 2020 - present

### Project Manager, Supply Chain Finance Lectorate - Zwolle, Netherlands

- **Value Chain Hackers:** Led a pan-European AI compliance initiative with university and industry partners. Captured partner requirements, coordinated joint deliverables, maintained stakeholder communications across multiple countries. ([valuechainhackers.xyz](https://valuechainhackers.xyz))
- **Self-hosted AI stack (Ubuntu/Docker):** Set up and maintain production AI infrastructure for research use. The operator-side Ubuntu experience that gives me both sides of the ISV conversation.
- **Spark! Living Lab:** Built a partner and student ecosystem from nothing. External partners, guest lecturers, corporate collaborators - captured requirements, built enablement, drove adoption.

## WDS Global

2008 - 2010

### Technical Support Engineer (3rd Line) & Trainer - Poole, England

- **HTC global enablement content:** Designed a tutorial video series as a scalable alternative to the 10,000+ email backlog. Proposed it to management. HTC adopted it globally as their standard customer education format. Partner-facing enablement content that outlasted its creator.
- Cleared the backlog by redesigning support templates and workflows. Trained retail staff at Tesco Scotland on smartphone sales.

## Hogeschool Inholland

2021 - 2022

### Guest Lecturer & Course Designer - Netherlands

- Designed two courses (Blockchain Minor + Dashboarding & Analysis) that still run independently, four years after I left. Enablement content that outlasts the creator - same design principle as the HTC tutorials.

## KONGSBERG

2012 - 2013

### Field Service Engineer + Data Quality Consultant - Kristiansand, Norway (deployed globally)

- Enterprise BI implementations on-site for BP (Jordan, Oman) and Statoil (Norway). Hardware, server and MOXA configuration, database setup, staff training. Cross-cultural partner communication across Arabic-speaking environments and Norwegian enterprise clients.
- BP Azerbaijan: data quality standards escalation. Read the contract overnight, built the case, escalated to executive level. Recommendation adopted.

## Social Chicken

2016 - 2022

### Freelance Senior Project Manager & Educator - Amsterdam, Netherlands

- Blockchain training via Inblock.io (Berlin/Amsterdam). Technical due diligence (Interactive: 4x exit). Private cloud, BI, and infrastructure work for local SMEs on Ubuntu-based stacks.

## Viridis Green-Tech AG

2024 - present

### Innovation Architect - Munich, Germany (remote)

- Ecosystem architecture for a sustainability and blockchain innovation lab. Partner development, grant co-authorship, and technical narrative design.

## PROJECTS

---

### Value Chain Hackers active

Pan-European AI and supply chain compliance initiative. Open-source. Self-funded infrastructure. Cross-border partner network across universities, companies, and research bodies.

[valuechainhackers.xyz](https://valuechainhackers.xyz)

### 2bSMART Benelux Network 2020 - 2022

Cross-Benelux blockchain technology network for supply chain professionals. Built the community, co-designed simulation-based training, ran events across three countries. Open-source training content designed for independent adoption.

[2bsmart.cz](https://2bsmart.cz)

## EDUCATION

---

### Bachelor of Business Administration, Business IT & Management - Hogeschool van Amsterdam

2010 - 2014

Grade 8.7. Thesis: simulation-based learning and training methodology at KONGSBERG (Norway).

CERTIFICATIONS

---

- Scrum Master
- Prince2
- ITIL
- Train the Trainer (Blockchain) [Blockchain Workspace](#)
- ESG & Sustainable Supply Chains

SKILLS

---

**Ecosystem:** software alliance management, partner enablement, open source GTM, community activation, W3C standards engagement, whitepaper authoring

**Linux / Ubuntu:** 10+ years production operation (Ubuntu, CentOS, Debian), Docker, Kubernetes, CI/CD, Nagios, private cloud, MOXA configuration

**Blockchain:** Ethereum, smart contracts, EOSIO, HyperLedger, SSI, MICA, W3C DID

**AI Stack:** Flowise, n8n, OpenWebUI, Supabase (self-hosted on Ubuntu/Docker)

**Languages:** Dutch (native), English (near-native), German (conversational)
