

Christiaan Verhoef

Product Manager, AI & Developer Tools | Builder, Founder, Daily User

Baarn, Netherlands (CET) +31 6 30 18 47 43 christiaan_gerardo@hotmail.com linkedin.com/in/christiaanverhoef

SUMMARY

Product builder and founder with a 12-year track record of shipping 0 → 1 AI and developer-tool products. Daily user of Supabase, Claude Code (MCP ecosystem), n8n, and Flowise -- I build personal and organizational AI infrastructure with these tools and encounter their failure modes in production. Co-founded Tonomy Foundation (open-source SSI infrastructure, W3C CCG contributor), where I owned the product roadmap and all technical architecture decisions from inception. Shipped multiple research-grade AI products at Windesheim University. Strong async-first, fully remote. The founding experience and daily user perspective that Supabase's OR clause describes: this is that.

CORE COMPETENCIES

Product Discovery	0 → 1 Product Building	MCP / AI Agent Ecosystem	Supabase / n8n / Flowise	Developer Tools UX
Technical Roadmapping	W3C Standards (SSI/VCs)	Stakeholder Alignment	Async-Native / Remote	Agile / Scrum (15+ yrs)

WORK EXPERIENCE

Windesheim University of Applied Sciences

Jan 2020 -- Present

Project Manager & AI Infrastructure Lead -- Supply Chain Finance Lectoraat

- **AI stack, built and owned:** Self-hosted Supabase, Flowise, n8n, OpenWebUI on Docker/Linux. Used in production by university researchers and students daily. I hit Supabase edge cases, n8n rate limits, and Flowise session management issues before typical enterprise users do -- because I'm running it myself.
- **Value Chain Hackers:** AI-driven compliance tooling for CSRD/EUDR supply chain audits. Principal investigator and PM. Defined requirements, shipped demonstrator, ran feedback loops with logistics professionals and legal teams. Active at valuechainhackers.xyz.
- **Spark! Living Lab:** Beer Game blockchain simulator, shipped from zero. Designed requirements, coordinated engineers, delivered live demonstrator. 5 years in use.
- **COVID-19 Mega Project:** Merged 8 university research tracks into one deliverable under hard deadline. Rebuilt assessment model mid-flight.

Tonomy Foundation

2021 -- Present

Co-Founder & Acting Product Lead

- Co-founded open-source SSI identity platform (Pangea/Tonomy ID) from zero. Made all product and architecture decisions: stack selection, feature prioritization, whitepaper design, partner integrations.
- Contributed to W3C Credentials Community Group -- Multi-Signature Verifiable Credentials and Conditional Proofs standard, implemented into did-jwt library (DIF). Know how open standards become developer tools from the inside.
- Led product through to active ecosystem stage with MICA-compliant architecture and W3C recognition. Ran 2-week sprint cycles with distributed team across Europe.

Aeres Hogeschool

2021 -- 2022

Lab Manager -- Innovation & Product Incubation

- Merged 8 courses into single sprint-based product track in under 2 months. Two student products reached operating startup stage (SafeScrum).
- Veles Farming: evaluated student concept, judged it viable against consensus, seed-invested, mentored to operating agri-tech company in Slovakia (EUR 2M funding). Product judgment under uncertainty.

Social Chicken (Freelance)

2016 -- 2022

Senior Product Advisor & Technical Lead

- Interactive: Technical due diligence for pre-seed startup. Positive investment recommendation. 4x investor exit.
- DevOps, private cloud infrastructure, CI/CD pipelines for SMEs. Linux, Nagios, Docker, full stack.

KONGSBERG

2012 -- 2013

Field Service Engineer -- BI Deployments (BP, Statoil)

- Solo deployment engineer across 4 countries (Jordan, Oman, Azerbaijan, Houston) in oil & gas safety-critical environments. No internet, no escalation path. Owned the full product delivery lifecycle end-to-end.
- Azerbaijan: subcontractor withheld contractually-obligated data. Read the BP contract, held position with division manager, resolved in one day without formal authority.

EDUCATION

Bachelor Business IT & Management -- Hogeschool van Amsterdam 2010--2014
Grade: 8.7/10. Thesis: simulation-based learning for complex system operators (KONGSBERG). Minor: E-discovery & digital forensics.

CERTIFICATIONS & TOOLS

Daily tools: Supabase, Claude Code (MCP), n8n, Flowise, OpenWebUI, Docker, Linux, PostgreSQL, GitHub CI/CD
PM certifications: Professional Scrum Product Owner I (PSPO I), Professional Scrum Master I (PSM I), Prince2, ITIL
Standards: W3C Verifiable Credentials, SSI/DID, MICA compliance
Languages: Dutch (native), English (near-native)
