

Evaluation: Capgemini - Engagement Manager

Date: 2026-05-21
URL: https://www.capgemini.com/nl-nl/jobs/386365-en_US+sap_btp
Archetype: Technical AI PM (adjacent) / Traditional Enterprise PM
Score: 2.5/5
Culture Fit: Poor
Legitimacy: Proceed with Caution
PDF: ❌
Verification: unconfirmed (WebFetch fallback)
CV Language: Dutch (NL company)

A) ROLE SUMMARY

Field	Value
Archetype	Enterprise PM / Engagement Manager (no clear AI component)
Domain	IT/Cloud consulting, enterprise delivery
Function	Manage, consult, sell
Seniority	Medior/Senior
Remote	Hybrid - Utrecht Leidsche Rijn
Team size	Not specified
TL;DR	Traditional IT/Cloud engagement manager at Capgemini NL, C-level stakeholder management, financial accountability, business development

Note: URL slug says "sap_btp" but the extracted role is "Engagement Manager" - possible URL mismatch or the SAP BTP expertise is a preference not listed in the JD. Verified JD text does not mention SAP BTP specifically.

B) MATCH WITH CV

JD Requirement	CV Evidence	Strength
HBO/WO degree	BBA Business IT & Management, HvA - grade 8.7	✅ Strong
Agile experience	SafeScrum, Scrum Master cert, agile lab design across 5+ university programs	✅ Strong
Prince2 / IPMA / PMI	Prince2 certified	✅ Strong
Stakeholder management C-level	Cross-lectoraat at Windesheim, industry/academic alignment, Viridis board	✅ Moderate
IT/Cloud project experience	Nagios, self-hosted AI stack, Meerschap B.V., KONGSBERG BI implementations	✅ Moderate
Project planning, budgeting	Supply Chain Finance lectoraat, Spark! Living Lab, Aeres	⚠️ Weak - limited evidence of financial P&L ownership
Business development / commercial	Tonomy Foundation (partner development), Viridis grant writing	⚠️ Weak - not enterprise consulting context
Dutch + English	Native Dutch, near-native English	✅ Strong
Large-scale program delivery	COVID-19 Mega Project (8 courses merged), VCH cross-European	⚠️ Moderate - education context, not enterprise IT

Gaps:

1. **Enterprise IT consulting delivery** - Christiaan's project experience is in education/research labs and self-funded innovation. Not enterprise consulting with SLAs and client P&L. *Mitigation: Frame KONGSBERG BI deployments (BP Jordan/Oman/Azerbaijan) as enterprise delivery.*
2. **Financial accountability (P&L)** - No direct evidence of managing budgets >€500k. *Hard gap - difficult to close without fabricating. Note: €2M funding for Veles Farming is adjacent but not direct P&L.*
3. **SAP BTP** - Not in CV. If it's a hard requirement (URL suggests it might be), this is a blocker.
4. **Willingness to travel** - Not stated in CV. *Mitigatable in cover letter.*

C) LEVEL AND STRATEGY

Level detected: Medior/Senior PM

Christiaan's natural level: Senior (he leads labs, programs, multi-stakeholder initiatives - but in education/research, not enterprise consulting)

Sell senior plan: Lead with KONGSBERG BI multi-site delivery (BP Jordan/Oman/Azerbaijan/Statoil) as enterprise field delivery. Frame Supply Chain Finance lectoraat as a multi-year program with industry partners. Emphasize Prince2 + SafeScrum as methodological depth.

If downleveled: Capgemini has defined pay bands. If offered a Medior rate, negotiate a Senior track with a 6-month milestone review, as role descriptions at Capgemini are often written senior but hired Medior.

Honest concern: This role is fundamentally commercial IT consulting - winning and delivering client accounts. Christiaan's background is academic/research-adjacent. The culture gap is significant.

D) COMP AND DEMAND

Data point	Value	Source
JD salary	Not specified	JD
Capgemini NL Senior Consultant/Manager	€65,000-€95,000/year estimated	Market knowledge
Christiaan's target	€65,000-€90,000	profile.yml
Market demand for IT Engagement Manager NL	High - stable consulting demand	General market

Capgemini NL is known for average-to-market salaries for consultants. Benefits (company car, 26 days, pension) add meaningful value.

E) CUSTOMIZATION PLAN

#	Section	Current	Proposed change	Why
1	Summary	Lab-builder identity	Open with multi-site delivery track record (KONGSBERG) + stakeholder management	JD is pure PM delivery
2	Experience	Windsheim/Spark! lead	Reframe as "multi-year program with industry, research, and government stakeholders"	Shows program scope
3	KONGSBERG	Field Service Engineer	Elevate BI implementations as enterprise delivery - BP Jordan/Oman/Azerbaijan	Closest enterprise delivery proof
4	Certifications	Listed flat	Surface Prince2 prominently	Direct requirement match
5	Skills	Lab/AI focus	Reorder: project management, stakeholder, delivery first	JD priority order

LinkedIn: Update headline to include "Program Manager" language. Add Capgemini as target company to follows.

F) INTERVIEW PLAN

#	JD Requirement	Story	S	T	A	R	Reflection
1	C-level stakeholder management	Windesheim cross-lectoraat alignment	Research group conflicting priorities	Bridge between departments	Created shared infrastructure and informal governance	Sustainable cross-dept collaboration	Earlier formal mandate would have accelerated it
2	Managing large teams under pressure	COVID-19 Mega Project	8 courses needed to merge during COVID	Design a simulation across all disciplines	Merged into single sprint-based project	Ran successfully, widely cited in university	Scope clarity upfront saves weeks later
3	Business development	Tonomy Foundation partner development	No enterprise distribution	Build partner network in identity/blockchain space	Led whitepaper, ecosystem mapping, partner outreach	Foundation achieved W3C recognition	Strategic narrative matters as much as product
4	Financial accountability	Veles Farming	Student project with no funding	Path to viability	Seed-invested, shaped concept, connected to investors	€2M funding raised, operating in Slovakia	Believing in a concept before it's credible is a skill
5	Prince2 / delivery methodology	Aeres SafeScrum integration	8 separate courses with no coherent delivery	Build single agile learning track	Implemented SafeScrum across all 8 courses	Delivered within 2 months, workload down, quality up	Structure liberates creativity - it doesn't constrain it

Red-flag questions:

- "Do you have experience managing large IT delivery budgets?" → "At KONGSBERG I managed end-to-end BI implementations across 4 client sites. In my research programs I managed external funding and grant processes. I'm comfortable stepping into P&L accountability and would find the Capgemini financial framework helpful structure."
- "Your background is mostly academic - why consulting?" → "Every lab I've built has been client-facing - the clients are researchers, students, industry partners. I translate between technical systems and non-technical stakeholders constantly. Consulting is the same skill in a commercial context."

G) POSTING LEGITIMACY

Assessment: Proceed with Caution

Signal	Finding	Weight
Posting age	December 31, 2025 - 5 months old	⚠️ Concerning
Apply button	Active at time of fetch	✅ Positive
URL mismatch	URL says "sap_btp", JD says "Engagement Manager"	⚠️ Concerning
JD specificity	Generic PM requirements, no specific tech/domain	⚠️ Weak signal
Company hiring	Capgemini NL is active in market, no major NL layoffs reported	✅ Positive
Reposting	Not in scan history (first scan)	Neutral

Context: Capgemini frequently keeps postings open for extended periods as they continuously hire consultants. The 5-month age is less alarming than it would be for a startup. However, the URL/title mismatch is worth clarifying before

investing significant application effort. **Recommend: verify the role is still active before writing a tailored application.**

H) CULTURE, PERSONALITY & LONG-TERM FIT

H1 - Org Culture Assessment

Stage and type: Large corporate consulting firm (approx. 60,000 employees in NL context). Capgemini NL is a traditional IT services and management consulting company operating on structured client-delivery cycles, billable hours, utilization targets, and internal hierarchy. It sits squarely on the maintain-and-deliver end of the build-vs-maintain spectrum.

Culture signals: The JD language is formal and competency-based ("delivers results," "manages stakeholders," "maintains client relationships"). No language around experimentation, innovation labs, or building new things. The role is fundamentally about winning and delivering client accounts within existing service lines, not creating new ones.

Physical/work environment: Hybrid at Utrecht Leidsche Rijn office - a corporate campus environment, not a lab or innovation space. The physical setting is conventional professional services.

Match against 2-year vision: The 2-year vision is a hackerspace: small group, shared world-building, high trust, new territory. Capgemini is the opposite of this in almost every dimension. Large org, slow decision cycles, low individual visibility, no building mandate, utilization-driven culture. Alignment: very low.

H2 - Personality Fit Table

Dimension	What the role requires	Christiaan's profile	Match
Starter vs. finisher	Finisher-heavy: delivery, account management, recurring client cycles	ENFP-T starter, strongest 0 to 1 and 1 to 2	Poor
Variety vs. repetition	Structured repetition: sales cycle, delivery, invoicing, account review	Thrives on variety, drains fast on repetition	Poor
Autonomy level	Execution within defined service lines, limited strategic autonomy	Needs ownership and design authority, not execution-only	Poor
Build vs. maintain	Maintain client relationships, deliver existing methodologies	Builder identity - maintenance depletes energy	Poor
Fractional fit	Full-time employment expected, utilization tracking	Optimal: 2 to 3 concurrent 0.4 to 0.6 FTE	Poor - fractional conflict
Energy spike tolerance	Onboarding in consulting is structured and credential-first; front-loaded energy would read as unfocused	Front-loaded high energy in first weeks	Risk
Team size	Large project teams within a large org	Small team, high trust preference	Poor

Flags: Full-time exclusivity expected (fractional conflict). No building mandate. Large corporate with slow decision cycles.

H3 - Values and Mission Alignment

Capgemini's mission is client delivery excellence in IT consulting. The work is commercially driven with no intrinsic frontier. Christiaan would be delivering SAP/cloud implementations for enterprise clients, managing P&L, and growing accounts. There is no learning innovation, no community building, no frontier domain, no room for the maker identity.

This is a purely transactional engagement. He would not talk about this work unprompted at a dinner party. The only honest motivator here would be the salary and the structure, which is a valid reason to apply but a fragile basis for sustained engagement.

H4 - Energy Analysis

Energizers for this role:

- Stakeholder management at senior level can be engaging for a room-reader (Albert Cuyp market skill applies)

- Initial engagement design (0 to 1 of a new client relationship) could briefly energize

Likely drains:

- Account maintenance and recurring delivery cycles - high drain
- Utilization pressure and billable hour tracking - structurally incompatible with ADHD-adjacent working style
- Large corporate decision cycles with low individual influence
- No building mandate, no experimentation space
- Full-time exclusivity preventing the multi-engagement model
- Heavy process compliance (consulting methodology frameworks, internal approvals)

H5 - 18-Month Durability Test

Rating: Short-term fit at best, plateau risk within 6 months.

The initial onboarding and first client engagement might sustain interest for a few months. But once the account management cycle sets in - same clients, same methodology, same quarterly reviews - the role becomes pure maintenance. There is no growth path toward anything Christiaan is aiming for. The 2-year vision diverges from this trajectory immediately. This role would feel like a wrong turn within a year.

H6 - Personality-Specific Red Flags

Red flag	Present?	Severity	Context
Role is primarily maintenance/ops	Yes	High	Account management and delivery are repetitive cycles, not builds
Solo sales of an unready product	Partial	Medium	Business development component involves selling Capgemini services - not unready, but sales-driven
Full-time exclusivity expected	Yes	Medium	Consulting firms expect full focus; multi-position model is structurally incompatible
Large corporate, slow decision cycles	Yes	High	Capgemini NL is a 60,000-person company with internal approval layers
Governance/board role in declining org	No	n/a	-
Ceremony-only Scrum Master	No	n/a	Not a Scrum role

H7 - Fit Verdict

The honest case for this match:

The KONGSBERG enterprise delivery experience translates. Prince2 certification is a direct requirement match. Capgemini's salary band (€65k to €95k) touches the target range. For a short-term income-stability move, this is defensible. The stakeholder management muscle and the rapid-rapport skills (market stall training, room-reading) would make Christiaan effective in client-facing consulting.

The honest case against:

This is the role least aligned with who Christiaan is at a personality level in this entire batch. The culture is corporate-hierarchical. The work is repetitive delivery. There is nothing to build. The fractional model is incompatible. The energy spike will read as a liability, not an asset. The 18-month picture is early disengagement and the resulting performance risk. The skill match is partial (P&L gap, SAP BTP gap, enterprise consulting gap) and the culture match is poor. The score cap rule applies: strong enough skill overlap to get an interview, but poor personality fit means this role should not be pursued over alternatives with stronger culture alignment.

Overall personality/culture fit: Poor

Note: Score of 2.5/5 already reflects the skill gaps. The culture assessment reinforces the low score. Do not apply unless all higher-scoring alternatives have been exhausted and income stability is the sole priority.
