

Evaluation: Vektis - Scrum Master (32/38 uur)

Date: 2026-05-21

URL: <https://werkenbij.vektis.nl/vacature/scrum-master-3238-uur-zeist-dutch-required-96>

Archetype: Traditional Scrum Master (not in primary archetypes)

Score: 3.5/5

Culture Fit: Conditional

Legitimacy: High Confidence

PDF: ✖

Verification: unconfirmed (WebFetch fallback)

CV Language: Dutch (NL company)

A) ROLE SUMMARY

Field	Value
Archetype	Traditional Scrum Master / Agile Coach (adjacent)
Domain	Healthcare data (Vektis = healthcare market data organization)
Function	Facilitate, coach, remove blockers
Seniority	Mid
Remote	Hybrid - Zeist
Team size	Multiple teams
TL;DR	Scrum Master coaching Agile teams at Dutch healthcare data organization, Dutch mandatory, PSM I required

B) MATCH WITH CV

JD Requirement	CV Evidence	Strength
Scrum Master certification (PSM I or CSM)	Scrum Master cert listed in CV	✔ Strong
Min 2 years as Scrum Master	Agile facilitation embedded in Spark! Living Lab, ROC, Aeres (not dedicated SM role)	⚠ Moderate - embedded, not titled
Agile coaching / team collaboration	Core of lab management and education programs	✔ Strong
Scaled frameworks (SafeScrum, Kanban)	SafeScrum implemented at Aeres (8-course merge)	✔ Strong
Cross-functional teams	All labs were cross-functional	✔ Strong
Fluent Dutch	Native	✔ Strong
Azure DevOps (preferred)	Not in CV	✖ Gap
Agile Portfolio Management	Not explicitly in CV	⚠ Gap

Gaps:

- Dedicated Scrum Master title** - Christiaan has always been SM as part of a broader role (Lab Manager, Program Manager). JD asks for 2+ years in dedicated SM function. *Mitigation: Frame Spark! Living Lab as "Scrum Master + facilitator" role - the facilitation and sprint management was a primary activity.*
- Azure DevOps** - Not in CV. Preferred, not required. *Low priority.*
- Healthcare data context** - No healthcare background. *Mitigatable - SM is process-agnostic.*

C) LEVEL AND STRATEGY

Level: Mid. Christiaan is over-qualified for this scope.

Concern: Applying as a Lab Manager / Program Manager with 15 years of experience for a mid-level Scrum Master role risks being dismissed as over-qualified. Salary range (€54k-€72k) is below Christiaan's target of €65k-€90k at the lower end.

If applying: Position as choosing a focused role deliberately (e.g., "I want to go deep on facilitation after years of building programs"). Only credible if genuinely motivated.

D) COMP AND DEMAND

Data point	Value	Source
JD salary	€4,500-€6,000/month = €54k-€72k/year	JD
Scrum Master NL market	€50,000-€80,000/year	iPeople NL 2026
Christiaan's target	€65,000-€90,000	profile.yml
Christiaan's minimum	€55,000	profile.yml
Assessment	Lower end (€54k) below minimum; upper end (€72k) in range	-

Only viable if Christiaan negotiates toward the upper band (€70k+). Healthcare sector typically has stable compensation but limited upward mobility.

E) CUSTOMIZATION PLAN

#	Section	Proposed change	Why
1	Summary	Focus on agile facilitation + coaching identity	JD is purely about facilitation
2	Spark! Living Lab	Highlight SM ceremonies, sprint reviews, retrospectives	Maps directly to JD responsibilities
3	Aeres	SafeScrum 8-course integration	Shows scaled framework experience
4	ROC Midden Nederland	Agile classroom as sprint environment	Reinforces facilitation track record
5	Certifications	Surface Scrum Master cert prominently	Direct requirement

F) INTERVIEW PLAN (ABBREVIATED - LOW PRIORITY)

#	Story	Key point
1	SafeScrum at Aeres - 8 courses into 1 sprint cycle	Scaled framework, fast implementation
2	COVID Mega Project - multi-team simulation	Cross-team facilitation under pressure
3	Spark! Living Lab - regular retrospectives and sprint reviews	Dedicated SM ceremonies in lab context

G) POSTING LEGITIMACY

Assessment: High Confidence

Signal	Finding	Weight
Posting date	May 12, 2026 - 9 days old	✓ Very fresh
Apply contact	Named recruiter (Maurice) with direct process described	✓ Strong
Salary transparency	€4,500-€6,000 clearly stated	✓ Strong
Company	Vektis is a real, established Dutch healthcare data organization	✓ Strong

RECOMMENDATION

Score 3.5/5 - below apply threshold (4.0). Re-scored upward after confirming 15+ years agile depth and school-wide SafeScrum implementation at Aeres.

Role is in the "avoid" archetype (traditional Scrum Master). Salary lower end is below minimum. Christiaan is over-qualified. Only worth pursuing if: (a) he specifically wants a pure facilitation role right now, or (b) Vektis is a strategic entry point for healthcare data sector. Negotiate toward €70k+ (upper band).

H) CULTURE, PERSONALITY & LONG-TERM FIT

H1 - Org Culture Assessment

Stage and type: Established Dutch non-profit / semi-public organization. Vektis collects and manages healthcare market data for the Dutch health insurance system. It is a stable, mission-driven organization with a public-service orientation - not a startup, not a commercial corporation. The culture is likely process-oriented, collaborative, and consensus-driven, with a focus on data quality and governance.

Culture signals: The JD language emphasizes coaching, facilitation, and psychological safety - Vektis is not asking for a change agent or a builder; it is asking for a steady facilitator of existing agile teams. The named recruiter (Maurice) and transparent salary suggest a human, approachable HR process. The healthcare data context implies regulatory care and measured decision-making.

Physical/work environment: Hybrid at Zeist office. Zeist is a quiet suburban town 30 minutes from Baarn - a comfortable commute. The office environment is likely conventional and professional, not a lab or maker space.

Match against 2-year vision: The 2-year vision is a hackerspace: small group, building new things, high trust, new territory. Vektis scores low on "new territory" and "building" - the organization is established and the role is to maintain agile cadences, not create them. The "high trust, small group" dimension is possible in a mid-size non-profit. Alignment is conditional: if the teams are genuinely early in their agile journey, there is a facilitation challenge worth engaging with; if they are mature teams needing ceremony management, it is a maintenance role.

H2 - Personality Fit Table

Dimension	What the role requires	Christiaan's profile	Match
Starter vs. finisher	Ongoing facilitation: ceremonies, retrospectives, impediment removal - finisher-heavy	ENFP-T starter, strongest 0 to 1 and 1 to 2	Poor match if teams are mature; acceptable if there is a coaching challenge
Variety vs. repetition	Repetitive sprint ceremonies (planning, review, retro, daily)	Thrives on variety, drains fast on repetition	Poor - sprint ceremony repetition is a known drain
Autonomy level	Moderate: facilitation within defined agile framework; limited design authority	Needs ownership, not execution-only	Moderate
Build vs. maintain	Maintain team agility and process health	Builder identity - maintenance depletes energy	Poor
Fractional fit	32 to 38 hours/week - part-time is possible at 32 hours	Optimal: 0.4 to 0.6 FTE	Acceptable: 32 hours (0.8 FTE) is closer to full-time than ideal
Energy spike tolerance	Stable non-profit culture - front-loaded energy may feel disruptive to consensus-first teams	Front-loaded high energy in first weeks	Risk: slow consensus culture clashes with ADHD-adjacent onboarding style
Team size	Multiple agile teams - likely 3 to 5 teams	Small team, high trust preference	Moderate

Flag: Engagement risk if teams are already mature and the role is ceremony-only. No building mandate confirmed.

H3 - Values and Mission Alignment

Vektis operates in healthcare data infrastructure - an area that genuinely matters for the Dutch health system. The mission (making healthcare data reliable and accessible) is not Christiaan's natural frontier, but it is socially

meaningful and not purely commercial. There is a potential connection to the "making people capable" theme if the coaching role involves genuinely transforming how teams work, but that connection is thin in this specific JD.

Christiaan would not seek this role for the mission. He would pursue it for: a stable income stream as one of multiple engagements, the 32-hour option that leaves room for other work, and the opportunity to sharpen dedicated facilitation credentials. These are valid but transactional motivations.

H4 - Energy Analysis

Energizers for this role:

- Facilitation and coaching mandate - core to what Christiaan does for free
- The 32-hour option creates space for parallel engagements
- Healthcare data is socially meaningful, even if not personally frontier
- Potential coaching challenge if teams are new to agile or struggling

Likely drains:

- Repeated sprint ceremonies without a build mandate - high drain risk
- No AI component, no innovation mandate
- Zeist office - suburban setting, not a lab or innovation environment
- Process compliance in a regulated data environment
- Overqualification dynamic: being managed at a level below his actual capability

H5 - 18-Month Durability Test

Rating: Plateau risk within 6 to 9 months.

If the teams are early in their agile journey, the first few months could be energizing - genuine coaching challenges, building new habits, designing retrospective formats. But once the teams reach a sustainable agile cadence, the role becomes ceremony management. At that point, the engagement risk is high. The 18-month picture is early disengagement unless Vektis offers expansion into an innovation or AI adoption mandate (nothing in the JD suggests this).

H6 - Personality-Specific Red Flags

Red flag	Present?	Severity	Context
Role is primarily maintenance/ops	Likely yes - ongoing facilitation of established teams	High	Ceremony-heavy role without confirmed build mandate
Solo sales of an unready product	No	n/a	Not a sales role
Full-time exclusivity expected	Partial	Low	32 hours is below full-time; fractional model partially compatible
Large corporate, slow decision cycles	Moderate	Medium	Non-profit consensus culture; not large corporate but not fast-moving either
Governance/board role in declining org	No	n/a	Stable organization
Ceremony-only Scrum Master	Possible	High	JD does not confirm a change or innovation mandate beyond standard SM duties

Flag: Engagement risk if role resolves to ceremony management with no coaching or change mandate confirmed.

H7 - Fit Verdict

The honest case for this match:

The 32-hour option is the strongest argument for this role. If Christiaan is building a portfolio of 2 to 3 concurrent engagements, Vektis at 32 hours/week (0.8 FTE on paper, negotiable as 4 days) is a viable income anchor that leaves room for other work. The facilitation skills are genuinely strong here. The healthcare data domain is socially meaningful. Vektis is a stable, humane employer - not a high-pressure environment. As a transitional income stream while building other engagements, this is defensible.

The honest case against:

This is a ceremony-facilitation role at an established non-profit with no AI component and no confirmed innovation mandate. The JD is asking for a finisher in a maintenance context, which is exactly where Christiaan's energy drops fastest. The overqualification risk is real - 15+ years of lab-building and organizational change for a mid-level SM role will generate friction in the hiring process and likely in the role itself. The condition for this working long-term is: Vektis provides a genuine coaching challenge or opens an innovation/AI mandate within 6 months.

Overall personality/culture fit: Conditional (condition: role involves genuine team transformation and/or opens into an AI/innovation mandate within the first 6 months; ceremony-only SM engagement risk is high without this)

Note: Score of 3.5/5 reflects the skill match. The culture fit assessment supports the recommendation to pursue only if the 32-hour option is confirmed and the role includes an active coaching challenge.
