

Evaluation: Roxit - Agile Coach

Date: 2026-05-21
URL: <https://www.werkenbijroxit.nl/jobs/7622187-agile-coach>
Archetype: Agile Coach / Organizational Change (adjacent to AI Transformation)
Score: 3.6/5
Culture Fit: Conditional
Legitimacy: High Confidence
PDF: ❌
Verification: unconfirmed (WebFetch fallback)
CV Language: Dutch (NL company)

A) ROLE SUMMARY

Field	Value
Archetype	Agile Coach / Organizational Change (no AI component)
Domain	Software company for Dutch local government
Function	Coach, facilitate, drive change
Seniority	Mid-Senior
Remote	Hybrid - Zoetermeer, Zwolle, or Arnhem
Team size	Multiple Agile teams
TL;DR	Agile Coach guiding teams and organizational change at Dutch government software provider, multi-location, Dutch required

A) ROLE SUMMARY (DETAIL)

Roxit builds software for Dutch municipalities and government bodies. The Agile Coach will coach Scrum teams + Product Owners, drive organizational agility, and serve as a thought partner for management. Better scope than a pure Scrum Master - has organizational change dimension.

Zwolle location is positive - same city as Windesheim, familiar environment for Christiaan.

B) MATCH WITH CV

JD Requirement	CV Evidence	Strength
HBO or equivalent	BBA Business IT & Management	✅ Strong
3+ years coaching multiple Agile teams	Spark! Living Lab, Aeres, ROC, Windesheim - all involved agile coaching	✅ Moderate (embedded, not titled)
Scrum + Kanban + Lean	SafeScrum, Scrum Master cert, agile learning design	✅ Strong
Supporting Product Owners	Windesheim cross-team coordination, student PO coaching	✅ Moderate
Organizational change / agility	COVID Mega Project (merging 8 courses), new lab models at Aeres and Windesheim	✅ Strong
Thought partner for management	Cross-lectoraat bridge at Windesheim, Viridis strategy	✅ Moderate
Dutch fluency	Native	✅ Strong
Business-IT understanding	ITIL, Oracle, BI deployments, tech project background	✅ Strong

Willingness to work across all locations	Baarn → Zwolle/Zoetermeer/Arnhem commutable	⚠️ Manageable with hybrid
--	---	---------------------------

Gaps:

- 3 years dedicated Agile coaching title** - Christiaan's coaching was always embedded in broader roles.
Mitigation: reframe Spark! Living Lab and Aeres as "Agile Coach + Lab Manager" combined role.
- Government/municipal software context** - No direct public sector delivery experience. *Mitigation: Research environments (Windesheim) have similarities in stakeholder complexity.*
- No AI component in role** - Roxit's Agile Coach has no AI mandate. This is below Christiaan's North Star. *Not mitigatable - is what it is.*

C) LEVEL AND STRATEGY

Level: Mid-Senior Agile Coach

Salary risk: €4,000-€6,000/month = €48k-€72k. Lower end (€48k) is BELOW Christiaan's minimum (€55k).

Negotiation: Must push for €5,500+/month (€66k+) to be within range. Given Christiaan's seniority (15+ years, lab management, organizational change), this should be achievable at the upper band.

Concern: The organizational change aspect is the most interesting part of this role, but it lacks any AI dimension. For Christiaan's career trajectory, this is a lateral or slightly backward move in terms of positioning.

D) COMP AND DEMAND

Data point	Value	Source
JD salary	€4,000-€6,000/month = €48k-€72k/year	JD
Agile Coach NL Amsterdam avg	€83,000/year	Glassdoor 2026
Agile Coach NL senior (8+ yrs)	€135,999	SalaryExpert 2026
Christiaan's target	€65,000-€90,000	profile.yml
Assessment	Role is priced below market; upper band (€72k) is in range	-

Roxit is a mid-size Dutch software company, not a consultancy or tech scale-up. Compensation reflects that.

E) CUSTOMIZATION PLAN

#	Section	Proposed change	Why
1	Summary	Lead with organizational change + agile coaching identity	JD emphasizes "agile mindset" and management partnership
2	Aeres	SafeScrum 8-course integration + startup incubation	Shows organizational change through agile
3	Spark! / Windesheim	Cross-lectoraat coordination	Shows management thought partnership
4	ROC Midden Nederland	Gamified agile learning system	Shows creative approach to coaching
5	Certifications	Surface Scrum Master + Prince2 + PSPO I	Methodological credibility

F) INTERVIEW PLAN (ABBREVIATED)

#	Story	Key point
1	SafeScrum at Aeres - 8 courses → 1 sprint cycle in 2 months	Organizational change through agile, fast
2	Windesheim COVID Mega Project	Multi-team facilitation under institutional pressure

3	ROC Midden Nederland - classroom as startup simulation	Coaching teams to autonomy and ownership
4	Windesheim cross-lectoraat	Thought partner for management, bridging isolated silos

G) POSTING LEGITIMACY

Assessment: High Confidence

Signal	Finding	Weight
Posting date	April 23, 2026 - 4 weeks old	✓ Fresh
Company	Real Dutch GovTech software company, established	✓ Strong
Contact details	Named contact (Daniëlle Krul), direct email, phone number	✓ Strong
Salary transparency	€4,000-€6,000 clearly stated	✓ Strong
JD specificity	Specific (Scrum, Kanban, PO support, management partnership)	✓ Strong

RECOMMENDATION

Score 3.6/5 - below apply threshold (4.0). Re-scored upward after confirming 15+ years agile depth and organizational change track record.

Agile coaching competency is a strong match. Organizational change dimension is interesting. But: no AI component, salary lower end (€48k) is below minimum, and this is a step away from Christiaan's North Star (innovation lab / AI transformation). Only worth pursuing if Christiaan wants to sharpen dedicated coaching credentials, or if the Zwolle location creates strategic network advantage (Windesheim adjacency). Negotiate €5,500+/month.

H) CULTURE, PERSONALITY & LONG-TERM FIT

H1 - Org Culture Assessment

Stage and type: Established Dutch software company (SME) serving Dutch local government (gemeenten). Roxit is a product company with a stable customer base in the public sector. It is not a startup - it has an established product and customer relationships - but the Agile Coach role has an organizational change dimension that is more interesting than a pure Scrum Master function.

Culture signals: The JD language includes "thought partner for management" and "organizational agility" alongside standard sprint facilitation. This signals a company aware that it needs to grow its agile maturity, not just run ceremonies. Named contact (Daniëlle Krul) with direct phone number and transparent salary range suggest an approachable, mid-size company culture.

Physical/work environment: Multi-location hybrid across Zoetermeer, Zwolle, and Arnhem. The Zwolle location is genuinely attractive - same city as Windesheim, familiar territory, existing professional network. The multi-location aspect adds variety to the work context and is a mild energizer.

Match against 2-year vision: The 2-year vision is a hackerspace: small group, building new things, high trust, new territory. Roxit scores low on "new territory" (government software is a stable, conservative domain) and "building new things" (the role is about coaching existing teams, not building new products). The Zwolle location and the organizational change dimension are the closest approximations to alignment. The match is conditional on whether the "thought partner for management" dimension translates into genuine organizational redesign work.

H2 - Personality Fit Table

Dimension	What the role requires	Christiaan's profile	Match
Starter vs. finisher	Mixed: organizational change is a starter activity; ongoing team coaching is finisher-heavy	ENFP-T starter, strongest 0 to 1 and 1 to 2	Moderate - depends on how much ongoing change work exists
Variety vs. repetition	Multiple teams, multiple locations - structural variety	Thrives on variety, drains fast on repetition	Good - multi-location and multi-team creates genuine

			variety
Autonomy level	Mid-Senior: "thought partner for management" implies real influence	Needs ownership, not execution-only	Moderate to good
Build vs. maintain	Mostly coach/maintain agile culture with some change mandate	Builder identity - maintenance depletes energy	Risk after initial change work is complete
Fractional fit	Full-time implied by multi-location hybrid	Optimal: 2 to 3 concurrent 0.4 to 0.6 FTE	Fractional conflict likely
Energy spike tolerance	SME culture - founders and management may respond well to energy and initiative	Front-loaded high energy in first weeks	Moderate
Team size	Multiple Scrum teams within a mid-size company	Small team, high trust preference	Moderate

Flag: No AI component confirmed. If the coaching role stabilizes without new organizational change mandates, engagement risk is high.

H3 - Values and Mission Alignment

Roxit builds software for Dutch municipalities. The mission is functional - helping local government operate more effectively through software. Christiaan would not seek this role for the mission. The government software domain is stable and conservative rather than frontier-driven.

However, the organizational change dimension connects to something he genuinely cares about: making organizations capable of working in new ways. If the Agile Coach role translates to genuine cultural change at a software company that needs to modernize its development culture, there is authentic engagement available. This is not a mission-driven role but it has a coaching mandate that connects to intrinsic identity.

Motivation for pursuing this is: Zwolle network and location advantage, organizational change work, stable income, and the management partnership dimension. Transactional with some intrinsic elements.

H4 - Energy Analysis

Energizers for this role:

- Organizational change mandate ("thought partner for management") - genuine coaching challenge
- Multi-location work creates variety and movement
- Zwolle base connects to existing Windesheim professional network
- Coaching teams to autonomy and ownership - intrinsically rewarding for Christiaan
- Mid-size company where individual contributions are visible

Likely drains:

- Government software domain - conservative, slow-changing customer environment
- No AI component - Christiaan's frontier interest is absent
- Once organizational change phase completes, role becomes ceremony management
- Full-time requirement conflicts with multi-engagement model
- Salary lower end (€48k) is below minimum - negotiation required to make this viable

H5 - 18-Month Durability Test

Rating: Short-term fit with plateau risk after organizational change phase.

The first 6 to 9 months could be genuinely engaging if Roxit is in active organizational change mode. Once the change phase completes and the teams reach a stable agile cadence, the role shifts to maintenance. At that point, without a new mandate (AI adoption, process innovation), the engagement risk is high. The absence of an AI component means the role does not contribute to Christiaan's North Star trajectory. Sustainable as a 12-month engagement with a clear exit or role evolution plan.

H6 - Personality-Specific Red Flags

Red flag	Present?	Severity	Context
----------	----------	----------	---------

Role is primarily maintenance/ops	Partial - change mandate now, maintenance later	Medium	Engagement risk when change phase completes
Solo sales of an unready product	No	n/a	Not a sales role
Full-time exclusivity expected	Likely yes	Medium	Multi-location hybrid implies full-time commitment
Large corporate, slow decision cycles	Partial	Low	SME with public sector clients - decision pace is moderate, not corporate-slow
Governance/board role in declining org	No	n/a	Stable company
Ceremony-only Scrum Master	Risk after change phase	Medium	If organizational change mandate ends, role becomes ceremony management

H7 - Fit Verdict

The honest case for this match:

The organizational change dimension and the management partnership role are genuinely interesting. The Zwolle location connects to Christiaan's existing network. Multi-location work creates variety. The company is mid-size - individual contributions are visible. If the change mandate is real and sustained, this role could use Christiaan's best facilitation and organizational design skills for 12 months. The coaching competency is a strong match.

The honest case against:

No AI component means this role does not advance Christiaan's North Star. Government software is a conservative domain. The salary lower end is below minimum. Full-time commitment conflicts with the fractional model. Once the change phase completes, the role risks becoming ceremony management, which is exactly where Christiaan's engagement drops. The role is best understood as a 12-month income anchor in a familiar location, not a long-term career move. The condition for applying: confirm the management partnership dimension is genuinely active and not just JD language.

Overall personality/culture fit: Conditional (condition: organizational change mandate is active and sustained for at least 12 months; ceremony-only risk if the mandate is fulfilled quickly)

Note: Score of 3.6/5 reflects the skill match and the coaching competency. Culture fit is conditional, not strong. Apply if Zwolle location and organizational change mandate are both confirmed.
