

[Report 014] Celonis - Client Engagement Partner, AI-Driven Transformation & Process Intelligence

Score: 2.1/5
Culture Fit: Poor
URL: <https://job-boards.greenhouse.io/celonis/jobs/7683568003>
PDF: 
Legitimacy: High Confidence
Verification: confirmed (WebFetch)
Date: 2026-05-21

A) ROLE SUMMARY

Dimension	Detail
Archetype	AI Forward Deployed (primary) + AI Transformation Lead (secondary)
Domain	Process Intelligence / Process Mining - enterprise SaaS
Function	Consult / lead / strategic account management
Seniority	Senior - 15+ years required
Remote	Hybrid - Zurich, Switzerland
Team size	Cross-functional Celonis teams (internal orchestration role)
TL;DR	A senior strategic advisor who owns the end-to-end value journey for Celonis's largest accounts, engaging C-suite executives to drive AI-powered process transformation and platform adoption.

B) MATCH WITH CV

Requirement Mapping

JD Requirement	CV Match	Strength
15+ years customer success, strategy consulting, or transformation	CV spans 2004-2026 - 20+ years total, but not in customer success or consulting at enterprise scale. Mix of education, lab building, project management, startups.	Weak - years present, enterprise consulting absent
Large-scale transformation programs	Aeres 8-course merge; Windesheim Spark! Lab institutional rollout; SafeScrum school-wide	Strong analogy - but institutional, not enterprise client-facing
Change management expertise	"Organizational Change & Implementation (Expert)"; Scrum implementation at Aeres	Strong methodology fit
C-suite executive engagement	No evidence of sustained C-suite relationship management at enterprise client level; closest: KONGSBERG CEO escalation (single incident)	Weak
AI-driven transformation experience	AI lab at Windesheim; VCH AI tools; self-hosted AI stack; currently interviewing practitioners	Moderate - lab context, not enterprise rollout
Celonis platform / process mining	No evidence	None
Customer success / account management	No formal customer success roles; community management (Open Food Chain) is closest	Weak
Revenue/adoption targets ownership	No quota-carrying track record. Tonomy Foundation sales attempt is the counter-example.	Concerning - see profile flag

Gaps

Gap	Blocker?	Mitigation
15-year enterprise consulting / CS requirement	Hard blocker - total years present, but wrong context	Cannot bridge; enterprise SaaS CS is a distinct career track
C-suite relationship management at enterprise scale	Hard blocker	No mitigation within CV scope
Celonis platform knowledge	Moderate - can be learned, but not having it vs. candidates who do is significant	Self-study; Celonis Academy free courses available
Revenue/adoption quota ownership	Flagged risk per _profile.md - solo sales of unready product = acknowledged failure context	Do not apply to roles with primary revenue accountability
Switzerland location requirement	Hard blocker - Celonis explicitly requires Switzerland residency and work authorization	Christiaan is based in Baarn, Netherlands; does not qualify

Critical hard blocker: "We are currently only considering candidates who are already based in Switzerland and have the legal right to work in Switzerland." Christiaan is in the Netherlands. This alone disqualifies the application regardless of all other factors.

C) LEVEL AND STRATEGY

Level detected: Director/VP equivalent (15+ years, C-suite engagement, large account ownership).

Verdict: Not applicable - location hard blocker terminates analysis. Even without the location constraint, the enterprise strategic consulting / customer success director profile is not Christiaan's natural archetype. He is a builder and educator, not a senior account executive managing multi-million-dollar enterprise relationships.

No strategy needed. Do not apply.

D) COMP AND DEMAND

Item	Data	Source
Client Value Partner / Sr. CSM at Celonis	\$150,000-\$250,000 USD base + significant equity and bonus (Celonis is pre-IPO)	Levels.fyi; Glassdoor
Zurich market premium	~20-30% above Amsterdam equivalent	Switzerland cost-of-living adjustment
Christiaan's target	€65,000-€90,000	_profile.md
Fit to target	Compensation would likely exceed target range - but location and profile blockers make this moot	N/A

E) CUSTOMIZATION PLAN

Not applicable. Hard blockers (location + experience archetype mismatch) prevent application.

F) INTERVIEW PLAN

Not applicable. Do not prepare for this role.

G) POSTING LEGITIMACY

Assessment: High Confidence

Signal	Finding	Weight
Posting freshness	Celonis API returned full content - active posting	Positive
Apply button	Active via Greenhouse API	Positive

JD specificity	Named role (CVP), named function (Value Engineering), named department, Switzerland location requirement is highly specific	Positive
Requirements realism	15 years is a high bar - appropriate for this senior strategic role	Positive
Company signals	Celonis is a well-funded process mining leader (Munich-based, \$1B+ valuation); no layoff signals in Value Engineering	Positive
Location restriction	Explicit Switzerland-only requirement - unusual but signals a real, scoped hire	Positive
Reposting pattern	No prior appearance in scan history	Positive

Context Notes: The Switzerland location restriction is unusual but explicable - Celonis likely has a strategic account cluster in the Swiss financial services or manufacturing sector that requires in-country presence. This is a real, scoped opening.

RECOMMENDATION

Score: **2.1/5** - Two hard blockers independently disqualify this role:

1. **Location:** Switzerland-only, no relocation. Christiaan is in the Netherlands.
2. **Experience archetype:** Enterprise strategic customer success / C-suite account ownership is not Christiaan's background. The transformation methodology expertise is real, but the enterprise consulting track record at the seniority level required is absent.

The additional flag from _profile.md: roles with primary revenue/adoption quota accountability are explicitly flagged as risk areas given the Tonomy Foundation experience. This role has adoption targets ownership as a core accountability.

Do not apply.

H) CULTURE, PERSONALITY & LONG-TERM FIT

H1 - Org Culture Assessment

Stage and type: Celonis is a well-funded enterprise SaaS scaleup (Munich HQ, global operations, \$1B+ valuation). The Value Engineering team has a consulting culture: client-facing, performance-driven, quota-linked. This is a high-performance account management environment. The culture rewards long-term relationship management, enterprise political navigation, and steady trust-building over time with C-suite stakeholders.

Culture signals: The JD language emphasizes sustained relationship management ("develop and maintain," "long-term vision," "end-to-end customer value journey") and commercial accountability ("drive adoption targets"). This is an enterprise customer success culture: structured, account-plan-driven, and commercially measured.

Physical/work environment: Hybrid Zurich. The role is also disqualified by location (Switzerland-only).

Match against 2-year vision: Very low. The role requires deep long-term account maintenance and political relationship management inside large enterprise client organizations. This is the opposite of the hackerspace build-and-launch energy. Additionally, the primary hard blocker (Switzerland residency) makes the cultural analysis somewhat academic.

H2 - Personality Fit Table

Dimension	What the role requires	Christiaan's profile	Match
Starter vs. finisher	Finisher-heavy: maintain and develop long-term enterprise relationships	ENFP-T starter	Poor
Variety vs. repetition	Account management involves repetitive relationship cycles with the same clients	Thrives on variety	Poor
Autonomy level	High nominal autonomy within accounts, but measured by adoption targets	Needs creative ownership	Moderate
Build vs. maintain	Maintain and deepen existing account relationships	Builder identity	Poor

Fractional fit	Full-time, Zurich-based	Optimal: fractional	Poor
Energy spike tolerance	Enterprise C-suite culture: slow, cautious, politically sensitive	Front-loaded high energy may destabilize trust-building	Risky
Team size	Cross-functional Celonis teams (orchestration role)	Small team preference	Moderate

Flags: Engagement risk. Maintenance trap (ongoing account management). Fractional conflict. Adoption quota accountability triggers the Tonomy failure mode flag.

H3 - Values and Mission Alignment

Process intelligence and process mining are commercially interesting but not intrinsically motivating for Christiaan. The role is about helping large enterprises get more value from their Celonis subscription - this is product adoption work, not frontier innovation. The AI-driven transformation label is present but the actual work is customer success for an enterprise SaaS platform. Purely transactional.

H4 - Energy Analysis

Energizers:

- Change management components (helping organizations transform processes) have some alignment with his methodology expertise
- C-suite relationship building involves rapid rapport skills he has trained since childhood
- Cross-functional orchestration has some variety

Likely drains:

- Long-term enterprise account management: maintaining relationships with the same clients over years depletes fast
- Adoption quota accountability: mirrors the Tonomy failure mode directly
- Zurich base requirement (hard blocker also creates practical drain)
- Enterprise SaaS consulting culture: slow decision cycles, political navigation, incremental progress
- No building, no facilitation, no teaching component

H5 - 18-Month Durability Test

Verdict: Not applicable (hard location blocker). If hypothetically placed in this role: Short-term fit at best

The account management cycle would become repetitive within 6-12 months. The quota-linked adoption pressure would replicate the Tonomy dynamic. The 18-month path in enterprise CS is deeper client entrenchment - the opposite of the variety and new-territory energy that Christiaan needs.

H6 - Personality-Specific Red Flags

Red flag	Present?	Severity	Context
Role is primarily maintenance/ops	Yes (ongoing account management)	High	Enterprise CS is fundamentally relationship maintenance
Solo sales of an unready product	Partial (adoption quota accountability without full product control)	High	Triggers Tonomy failure mode flag
Full-time exclusivity expected	Yes	Medium	Full-time Zurich role
Large corporate, slow decision cycles	Yes	Medium	Enterprise client orgs have slow buying/change cycles
Governance/board role in declining org	No	N/A	Not applicable
Ceremony-only Scrum Master	No	N/A	Not applicable

H7 - Fit Verdict

The honest case for this match:

Celonis as a company is interesting - process intelligence and AI-driven transformation are genuinely relevant domains. Christiaan's change management methodology and facilitation skills have real relevance. If this were a learning/enablement or innovation lab role at Celonis, the company fit would be better.

The honest case against:

Wrong role archetype for Christiaan's personality. Enterprise customer success with adoption quotas triggers the known failure mode. Switzerland location is a hard blocker. The cultural environment (long-term account maintenance, C-suite political navigation, quota pressure) is misaligned with the ENFP-T starter who thrives on new builds and new relationships, not sustained account development.

Overall personality/culture fit: Poor

Title: Client Engagement Partner - AI-Driven Transformation & Process Intelligence

Location: Zurich, Switzerland

Department: Value Engineering

Company: Celonis

Job ID: 7683568003

Celonis, the global leader in Process Intelligence and Process Mining technology, seeks an experienced professional for this strategic role. The company describes itself as "one of the world's fastest-growing enterprise SaaS companies" focused on unlocking productivity through intelligent business processes.

Role Overview

The Client Value Partner (CVP) serves as the accountable lead for customer success with strategic accounts. This position involves engaging C-level executives to define long-term vision, mobilizing internal resources, and driving measurable business impact across various processes and industries.

Key Responsibilities

- Develop and maintain relationships with C-suite stakeholders
- Ensure proper resource staffing from cross-functional Celonis teams
- Lead the end-to-end customer value journey and resolve escalations
- Organize customer advisory boards and gather industry feedback
- Champion transformational initiatives and foster innovation
- Drive adoption targets and platform value realization

Required Qualifications

Candidates need "minimum 15 years of relevant customer success, strategy consulting, or related experience."

Additional requirements include demonstrated expertise in large-scale transformation programs, change management practices, and the ability to navigate complex global organizations. Experience with AI-driven transformation is preferred.

Compensation & Benefits

Base salary plus bonus/commission, equity (RSUs), and comprehensive benefits including 24 weeks paid parental leave, unlimited PTO, hybrid work flexibility, wellness programs, and professional development opportunities.

Important Note: Celonis requires candidates already based in Switzerland with legal work authorization; relocation and visa sponsorship are not available.
