PDF: 

Legitimacy: High Confidence

Verification: confirmed (WebFetch)

Date: 2026-05-21

A) ROLE SUMMARY

Field	Detail
Archetype	AI GTM / Industry Sales Lead (not in standard 6-archetype taxonomy - closest: AI Solutions Architect + AI Transformation, but fundamentally a senior sales/GTM role)
Domain	Enterprise data & AI platform, Retail & Consumer Goods vertical
Function	Build & manage - GTM architecture, revenue programs, partner ecosystems, C-suite relationships
Seniority	Senior Director / VP equivalent (EMEA vertical owner, reports to Global VP Consumer Industries)
Remote	Remote - UK, Germany, Netherlands, France
Team size	Not specified; builds and enables the vertical from scratch
TL;DR	EMEA owner for Databricks' Retail & CPG GTM - build the revenue engine, own C-suite relationships, carry (or heavily influence) revenue targets for a major vertical across all of EMEA.

Archetype note: This is a hybrid GTM / Industry Sales Leader role. It has elements of thought leadership, ecosystem building, and enablement - but the core of the role is driving revenue. Databricks' "Go To Market" department designation and language like "accelerate revenue growth," "convert them into systematic, scalable revenue programs," and "high-value use cases" makes this a quota-influencing or quota-carrying senior sales leadership position.

B) MATCH WITH CV

Requirements vs CV mapping

JD Requirement	CV Match	Strength
Senior leadership experience in Retail or Consumer Goods	Supply chain finance lectorate (Windesheim), beer game demonstrator, VCH traceability (CPG-adjacent supply chain), EUDR/CSRD compliance tools	Partial - supply chain finance and compliance tooling is CPG-adjacent, but no direct retail industry experience or P&L ownership in retail sector
Proven GTM architecture on tech platforms	No direct GTM/sales architecture experience. Business development exists (Tonomy, Open Food Chain, VCH), but at ecosystem/grant level, not enterprise B2B sales	Weak
C-suite executive relationship building	Stakeholder alignment across universities, grant bodies, innovation programs; KONGSBERG (BP, Statoil)	Partial - academic and research C-level, not enterprise tech procurement decision-makers
Large-scale change initiative leadership	8-course merge at Aeres, Scrum school-wide implementation, COVID-19 mega project	Strong - but these are educational sector transformations, not enterprise technology sales programs

Deep data & AI landscape familiarity	Self-hosted AI stack (Flowise, OpenWebUI, n8n, Supabase), VCH AI compliance tools, DevOps stack	Moderate - hands-on practitioner, not enterprise data platform architect or Databricks/Spark specialist
European regulatory environments (GDPR, sustainability reporting)	CSRD, CSDDD, EUDR compliance tooling via VCH; sustainability via Viridis	Strong - this is genuine expertise
Sales team training and enablement	Train-the-trainer certification; course design; professional training programs	Moderate - L&D expertise confirmed, but at educational level not sales enablement
English + French or German proficiency	English (B2/near-native); German conversational	Partial - German is conversational, not strong proficiency; no French
Partner ecosystem building (ISVs, SIs, alliances)	Tonomy ecosystem, VCH cross-European initiative, Open Food Chain community	Partial - open-source / Web3 ecosystem building, not enterprise SI/ISV alliance management

Gaps

Gap	Blocker?	Mitigation
No direct retail industry experience	Hard blocker - role title is literally "Retail & CPG Leader" requiring deep sector credibility	None available in CV. Supply chain is adjacent but interviewers expect direct retail/CPG sector tenure
No enterprise B2B sales track record or revenue ownership	Hard blocker - this is fundamentally a sales leadership role	Christiaan has never carried quota. All business development is at grant/partnership/community level
No Databricks / Spark / Delta Lake ecosystem knowledge	Hard blocker for credibility with customers at this level	Can be learned but not demonstrable at interview
No GTM or sales operations architecture experience	Hard blocker	Not in CV at any point in career
Language requirement (strong French or German)	Partial blocker - German is conversational, not "strong proficiency"; no French	Cannot be mitigated quickly
Enterprise C-suite relationship portfolio in tech procurement	Hard blocker	KONGSBERG (oil & gas), academic stakeholders - different context entirely

Summary: This role requires a track record in enterprise tech sales or a senior vertical leadership role at a major tech company (think former VP Retail at SAP, Oracle, Salesforce, or similar). Christiaan's profile doesn't come close to the required background. The supply chain / CPG adjacency is real but insufficient.

C) LEVEL AND STRATEGY

Level detected: Senior Director / VP (EMEA vertical owner, reports to Global VP, builds from scratch)

Christiaan's natural level for this archetype: Does not map. Christiaan has never operated in enterprise tech sales or GTM leadership. The closest analog is innovation lab director / ecosystem builder - which is 2-3 levels removed in organizational terms.

Why this doesn't work strategically:

- This role will receive applications from former retail VPs at SAP, Oracle, Microsoft, or from Databricks-adjacent sales leaders who know the retail tech landscape intimately.
- Christiaan's supply chain knowledge is academic/research-oriented (university lectoraat). The JD wants someone who has sold to Carrefour, Tesco, or Zalando's data team.
- Even if interest was mutual at screening, the "revenue growth" language signals that Christiaan would be evaluated primarily as a sales leader. This is precisely the gap flagged in _profile.md (solo sales of unready product = known failure mode).

Recommendation: Do not apply. Structural mismatch on role type (sales vs. build/teach), not just experience gaps.

D) COMP AND DEMAND

Metric	Estimate	Source
Market range (EMEA vertical leader, senior sales)	€150,000-€250,000 OTE (base + commission)	Glassdoor / Levels.fyi for Databricks Senior Director, Enterprise Sales, EMEA
Databricks compensation reputation	Top-quartile tech comp; OTE structure with significant variable for GTM roles	Known industry data
Christiaan's target range	€65,000-€90,000 (or €600-€1,200/day fractional)	_profile.md
Fit	Severe mismatch - this role pays 2-3x above Christiaan's target, designed for a different career level entirely	

Note: The compensation gap is actually a further signal of how misaligned this role is. This is a VP-level EMEA sales job, not an innovation builder role.

E) CUSTOMIZATION PLAN

Not applicable - role is not recommended. No CV customization would bridge the structural mismatch between a senior enterprise GTM/sales leadership role and Christiaan's innovation builder / educator profile.

If forced to attempt an application (user override):

#	Section	Current	Proposed change	Why
1	Summary	Lab builder / educator framing	Reframe around "EMEA ecosystem builder for emerging technology verticals"	Closest honest reframe
2	VCH project	AI-powered compliance tools	Lead with supply chain + EUDR/CSRD as Retail & CPG relevant	Genuine regulatory knowledge
3	KONGSBERG	Oil & gas BI deployments	Reframe as "enterprise client delivery across BP, Statoil"	Real enterprise exposure
4	Windesheim	University lectoraat	Lead with "applied research translating to commercial strategy"	Weakest reframe
5	Language skills	German conversational	Be explicit about level; do not overstate	Integrity

F) INTERVIEW PLAN

Not recommended for this role. Provided in abbreviated form for completeness if user overrides.

#	JD Requirement	STAR+R Story	Reflection
1	Partner ecosystem building	Tonomy Foundation: built partner/developer ecosystem for open-source identity infrastructure	Learned that ecosystem energy needs a clear commercial anchor - pure mission doesn't sustain momentum
2	C-level stakeholder management	KONGSBERG: escalated data contract breach to CEO on active oil rig deployment with BP Jordan	Systematic execution after fast diagnosis - pattern that works
3	European regulatory environments	VCH: built CSRD/CSDDD/EUDR compliance tooling and framework	Academic → commercial translation is a real skill; retail CPG applicability is genuine
4	Sales team enablement	Train-the-trainer at The Fork / blockchain training programs	Closest analog to sales enablement, but still a reach

Red-flag questions:

- "Have you carried quota before?" → Be honest: "No direct quota ownership. My revenue contribution has been through ecosystem building, partnership development, and securing €2M in innovation funding. I understand that's a different model than enterprise sales."
- "Do you have Databricks or cloud platform experience?" → "I've worked with self-hosted AI infrastructure. I'm familiar with the Databricks ecosystem conceptually but not as a practitioner at enterprise scale."

G) POSTING LEGITIMACY

Assessment: High Confidence

Signal	Finding	Weight
Posting freshness	Active listing on Greenhouse, requisition ID present	Positive
Apply button	Active via Greenhouse API	Positive
JD specificity	Highly specific - named geographies, named regulatory frameworks, clear org structure (reports to Global VP Consumer Industries)	Positive
Requirements realism	Requirements are internally consistent and match a real senior GTM role archetype	Positive
Company hiring signals	Databricks is consistently hiring and growing; no recent layoff news in GTM/sales	Positive
Role-company fit	Makes complete sense - Databricks is building industry verticals across EMEA	Positive

Context notes: This is a real opening. The posting is legitimate. The mismatch is about fit, not legitimacy.

H) CULTURE, PERSONALITY & LONG-TERM FIT

H1 - Org Culture Assessment

Stage and type: Databricks is pre-IPO, high-growth, commercially aggressive. The GTM / vertical sales function is where the company's revenue pressure is most acute. The Retail & CPG EMEA Leader is a Senior Director level role within the Go To Market organization - this is not a builder or advisor function, it is a sales leadership function with EMEA revenue responsibility.

Culture signals: "Accelerate revenue growth," "convert into systematic, scalable revenue programs," "operate with the mindset of a founder of a hyper-growth enterprise" - the language is explicitly sales-leader language. The culture expectation is a senior GTM leader who has built and carried vertical revenue programs at major enterprise tech companies.

Physical/work environment: Remote across UK, Germany, Netherlands, France. The primary environment is enterprise client meetings, industry events, and executive relationship building.

Hackerspace vision match: Very poor. The role requires a VP-level enterprise sales culture: C-suite relationship cultivation, revenue ownership, formal thought leadership. The "small group, high trust, new territory" dynamic is completely absent from this function. Score: 0/10 against the 2-year vision.

H2 - Personality Fit Table

Dimension	What the role requires	Christiaan's profile	Match
Starter vs. finisher	Build the Retail/CPG vertical from scratch THEN scale revenue consistently	ENFP-T starter	Partial match on the build phase; the scale-and-sustain-revenue phase is a hard drain
Variety vs. repetition	High variety (multiple accounts, multiple geographies)	Thrives on variety	This is a partial positive - the account variety is real
Autonomy level	Very high - EMEA owner	Needs ownership	Strong match on autonomy
Build vs. maintain	Build the vertical GTM from first principles	Builder identity	Partial match on the founding energy language ("founder

			mindset")
Fractional fit	Full-time, travel-heavy, VP-level commitment	Optimal: 2-3 concurrent 0.4-0.6 FTE	Completely incompatible
Energy spike tolerance	The C-suite enterprise sales world expects sustained executive gravitas, not front-loaded energy spikes	Front-loaded high energy	Poor - the cultural expectation is methodical executive presence
Team size	Builds a team; EMEA-wide scope	Small team preference	Neutral

Flags: fractional conflict (hard incompatibility); solo sales risk (EMEA revenue ownership without established enterprise sales track record); role type mismatch (sales leadership vs. innovation building).

H3 - Values & Mission Alignment

No meaningful mission alignment. This is a revenue-generation role for a commercial platform company. The supply chain and EUDR/CSRD angle provides a thin intellectual connection, but the work is fundamentally enterprise sales enablement and C-suite relationship cultivation for revenue. Christiaan does not care about driving Databricks' Retail & CPG revenue in EMEA.

Verdict: No alignment. Purely transactional in the worst sense - the transaction is someone else's revenue, not a mission Christiaan shares.

H4 - Energy Analysis

Energizers:

- Building from first principles: the "founder of a hyper-growth enterprise" framing taps the builder energy
- Thought leadership component: white papers, industry events - content creation is genuine energy
- EUDR/CSRD and sustainability regulatory expertise: genuine domain advantage and intellectual interest
- Pre-IPO culture energy

Drains:

- Revenue ownership without an enterprise sales background: this is the Tonomy failure mode at much higher stakes. Solo revenue responsibility for an EMEA vertical without the track record to back it up is the worst possible use of Christiaan's profile.
- C-suite enterprise sales culture: requires sustained, formal executive gravitas - the ENFP-T energy spike reads as inconsistent and unfocused in this context
- No building mandate after the GTM architecture is established: once the plays are defined, the job becomes execution - which is finisher mode
- Full-time exclusivity: completely incompatible
- Comp at VP-level (€150k-250k OTE) is above target and signals a seniority level Christiaan has not operated at in enterprise tech sales

H5 - 18-Month Durability Test

Rating: This role would be acutely distressing within 6 months.

The combination of enterprise sales revenue pressure, C-suite relationship expectations in retail/CPG (a domain Christiaan does not know), and no established track record is the recipe for the Tonomy failure repeated at a much larger scale. The initial "build the vertical" mandate would energize briefly. Within 3-6 months, the revenue pressure and domain credibility gap would compound into a performance concern. This is not a stepping stone; it is a poor match that would harm Christiaan's confidence and reputation.

H6 - Personality-Specific Red Flags

Red flag	Present?	Severity	Context
Role is primarily maintenance/ops	No	N/A	It is a build role, which is why it superficially appeals
Solo sales of an unready product	Yes - amplified	Critical	EMEA revenue ownership for a vertical Christiaan does not know, without an enterprise sales track record, is the Tonomy failure

			mode at 10x scale
Full-time exclusivity expected	Yes	High	VP-level GTM role; fractional is not possible
Large corporate, slow decision cycles	Partial	Low	Databricks moves fast; the enterprise client side moves slowly
Ceremony-only role	No	N/A	Not applicable
Governance in decline	No	N/A	Not applicable

H7 - Fit Verdict

Case FOR: The "founder mindset" and build-from-scratch mandate taps genuine energy. The supply chain and EUDR/CSRD regulatory expertise provides a real, if niche, edge in the CPG vertical. Databricks' pre-IPO culture rewards initiative.

Case AGAINST: This role triggers the solo-sales-of-unready-product failure mode at maximum severity. EMEA revenue ownership in a vertical where Christiaan has no enterprise client relationships, no quota track record, and no Databricks platform expertise is a path to a high-profile failure. The comp premium (2-3x above target) signals a seniority level that does not match the profile. The personality fit is independently poor: the enterprise GTM sales culture is antithetical to the ENFP-T builder identity.

Score cap note: The 2.2/5 score is correct. Culture fit analysis confirms this is the right call and provides additional reason to avoid: the personality-role mismatch is severe and independent of the skill gaps.

Overall personality/culture fit: Poor

Title: Retail & Consumer Goods EMEA Leader

Requisition ID: SLSQ127R516

Location: Germany; London, United Kingdom; Netherlands; Paris, France

Department: Go To Market

Office: Remote - United Kingdom

Company: Databricks

Overview

This role involves architecting and executing a market-defining strategy for Retail and Consumer Goods in EMEA. The position requires building scalable go-to-market operations from the ground up, operating with "the mindset of a founder of a hyper-growth enterprise."

Key Responsibilities

- Designing and executing go-to-market strategies that establish C-level relationships and accelerate revenue growth across retail, consumer goods, restaurants, and wholesale sectors
- Identifying high-value use cases and converting them into systematic, scalable revenue programs
- Building partner ecosystems with ISVs, SIs, and alliances from first principles
- Creating sales plays tailored to EMEA's diverse geographies while supporting other regions
- Establishing Databricks as an authoritative voice through thought leadership, white papers, and industry event participation
- Serving as a trusted advisor across product, sales, pre-sales, marketing, and partner teams
- Developing industry-specific collateral and demand generation campaigns
- Building enablement content that elevates the entire verticalized sales organization

Required Qualifications

- Senior leadership experience in Retail or Consumer Goods
- Proven ability to operate in ambiguous environments with incomplete information
- Extensive go-to-market architecture experience on technology platforms
- Executive relationship-building capabilities with C-suite leaders
- Large-scale change initiative leadership experience
- Deep familiarity with data and AI landscapes and retail technology standards
- Understanding of European regulatory environments (GDPR, sustainability reporting, etc.)
- Complex vertical initiative management experience
- Sales team training and enablement proven success
- Fluency in English with strong proficiency in French or German

About Databricks: A data and AI company serving over 10,000 organizations worldwide, including more than 50% of the Fortune 500.
