Celonis

Head of Industry - Retail & CPG

21 May 2026

Dear Celonis team,

CSRD, CSDDD, and EUDR are forcing Retail and CPG companies to see their supply chains clearly for the first time. That is the compliance wave I have been building tools for. At Windesheim, I lead the Value Chain Hackers initiative: AI-powered supply chain traceability and compliance tooling for EUDR and CSRD, built with a cross-European research and student team, live at valuechainhackers.xyz. The demand for this work is coming from exactly the buyers Celonis is targeting in Retail and CPG.

The 0-to-1 pattern is documented across the career: Spark! Living Lab (built from nothing in 2020, running cross-European programs in 2025), Aeres innovation hub (blank slate to school-wide agile system in under 2 months), Tonomy Foundation (co-founded open-source protocol from three people to W3C recognition). "Build and lead a cross-functional team solving enterprise challenges from scratch" is the description that matches every chapter of the career.

I want to be honest about the scale: leading a 100-person practice is a step up from the labs and programs I have run. My teams have been small and cross-functional - faculty, students, partners, investors. The commercial scale is the honest gap. The building mandate is exactly matched.

If the right entry point is a Principal or Value Engineering role with a path to practice leadership, I am open to that conversation.

Kind regards,

Christiaan Verhoef
