Databricks

Sr. Engagement Manager (Munich)

21 May 2026

Dear Databricks team,

In 2012, on an oil rig in the North Sea with no internet access, I read a data contract, found the breach, and called the CEO of the partner company. They complied. That is the kind of trusted advisor interaction this role describes: operating at executive level, knowing the substance well enough to name what is wrong, and holding the conversation without losing the relationship.

The trusted advisor pattern runs through the career. At KONGSBERG, I delivered for BP and Statoil in Jordan, Oman, and Azerbaijan: scoping, implementation, training, sign-off. At Windesheim, I am currently the external practitioner who interviews organizations on their AI tool adoption - a consulting relationship built on having built the same kind of systems myself.

Currently I work with Viridis Green-Tech, a Munich-based organization, on blockchain ecosystem architecture - which gives me direct DACH market familiarity and a German working context.

I want to be honest about the platform gap: I do not have Databricks, Spark, or Delta Lake experience. At Senior Engagement Manager level, that is a significant gap for a company that sells exclusively on its own platform. If there is a route that accounts for a platform learning period - or if you have a role at a level where the advisory and program management skills are the primary requirement - I would welcome that conversation.

Kind regards,

Christiaan Verhoef
